Re: Permitting of Cleveland Coal Sales

Dear Mr. May,

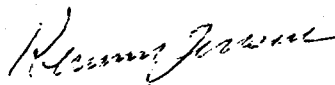

After recent discussions with Mr. Holland Shepard of your Price office, it has come to my attention that a permit may be required for my coal yard operation located in Cleveland, Utah.

I also have recently talked with Mr. Andy King about the necessary requirements to comply with the state's permit regulations. Mr. King has informed me that there could be quite an extensive and expensive process in obtaining the needed permit. Further discussions with Mr. Shepard have led me to believe that this may indeed be the case. Mr. Shepard has also informed me that the status of the land may change if in fact this permit is just applied for let alone approved. Mr. Shepard also stated that clear cut solutions could not be obtained until the permitting process had run it's course.

At this time I would like to request a meeting with you and your staff to discuss the ramifications of the permitting process and to determine a course of action.

I will be available for discussions with you anytime after the week of May 25 - May 30. You may contact me at 801-653-2475 with the time and place of the meeting. Thank you. 653-2233

Sincerely yours,

Kerwin Jensen
